Ahmed Ibrahim

Full-Stack Developer | MERN & AI Integration | Transforming Business Ideas into Scalable, User-Friendly Web Applications

القاهرة مصر

موجز

Are you looking for a skilled Full-Stack AI-Powered Web Developer to bring your ideas to life and solve your toughest tech challenges? I specialize in crafting robust, scalable, and intelligent web applications tailored to meet your business goals.As a freelance developer, I combine core backend and frontend expertise—such as Node.js, Express.js, MongoDB, and React.js—with cutting-edge Generative AI integration to deliver end-to-end solutions that elevate user experiences and drive results.The Challenges I Help You Overcome: - Outdated Systems amp; Static Experiences: I modernize web applications by integrating smart, AI-driven features (such as intelligent chatbots and automated content summarizers) to keep users deeply engaged. - Underperforming Websites: I optimize web applications for speed, performance, and clean architectural design. - Complex User Interfaces: I simplify workflows and create intuitive designs using modern tools like Tailwind CSS and shadcn/ui. - Security & Scalability Risks: I implement secure coding practices, reliable REST APIs, and efficient data management.Why Work With Me? - Practical AI Solutions: I help businesses harness real-world AI—working with Large Language Models (LLMs), prompt engineering, token management, and running open-source models locally using Ollama and Hugging Face. - Expert Technical Skills: Proficient in JavaScript, TypeScript, React.js, Node.js, Prisma, REST APIs, and real-time features with Socket.io. - Seamless Collaboration: I communicate clearly and work efficiently to keep your project on track. - Long-Term Impact: I build maintainable solutions designed to grow with your business and adapt to future changesCore Skills amp; Technologies• Full-Stack Web Development • AI Application Development amp; LLMs • Prompt Engineering amp; Context Windows • React.js amp; TypeScript • Node.js amp; Express.js • Local Model Integration (Ollama amp; Hugging Face) • MongoDB amp; Prisma ORM • Tailwind CSS amp; shadcn/ui • REST APIs & Real-Time

Applications (Socket.io) • Performance Optimization & Clean Architecture Let’s connect! If you’re ready to bring your vision to life and build smarter applications, send me a message and let’s discuss how I can help your business thrive in the digital world.

الخبرة

Freelance
Full Stack Engineer

Designed and developed a full-stack ticketing platform using Next.js, Node.js, Express, and MongoDB, enabling real-time issue tracking across departments. Implemented role-based access control (RBAC) for admins, managers, and employees to manage ticket creation, assignment, and resolution workflows. Built dynamic frontend interfaces with React (Next.js) and Tailwind CSS, ensuring responsive UI/UX for internal users. Created secure RESTful APIs with Express.js, including ticket status updates, notifications, and department-based filtering. Deployed the application to a fast cloud environment (Netlify) with environment-based configuration and JWT/cookie authentication.

NANSC
#2# من الأعوام ##3# ش٥ور#

Navigation system admin
٢٠٢٤ #أغسطس - Present (#2# من الأعوام ##3# ش٥ور#)

Administered and maintained Linux-based systems (CentOS/RedHat) supporting radar surveillance platforms and real-time air navigation infrastructure. Ensured system security, uptime, and performance for critical radar computing units (SDPS), with a focus on redundancy and disaster recovery. Collaborated with radar and air traffic teams to integrate Linux servers with surveillance sensors (PSR, SSR, ADS-B, MLAT, Mode S). Diagnosed and resolved system-level issues, implemented patches, and documented procedures in line with aviation safety standards.

Linux System Administrator
٢٠٢٤ #أغسطس - Present (#2# من الأعوام ##3# ش٥ور#)

Administered and maintained Linux-based systems (CentOS/RedHat) supporting radar surveillance platforms and real-time air navigation infrastructure. Ensured system security, uptime, and performance for critical radar computing units (SDPS), with a focus on redundancy and disaster recovery. Collaborated with radar and air traffic teams to integrate Linux

servers with surveillance sensors (PSR, SSR, ADS-B, MLAT, Mode S). Diagnosed and resolved system-level issues, implemented patches, and documented procedures in line with aviation safety standards.

Backend Developer – Realtime Chat Application
(#فبراير ٢٠٢٥ - #يونيو ٢٠٢٥ (#5## ش٥ور#
الإمارات العربية المتحدة

Developed server-side logic for a real-time chat application using Socket.io, Express.js, and MongoDB, enabling instant message delivery and storage.

Designed and implemented scalable event-driven architecture for chat rooms, message history, and user session handling.

Deployed the backend to an AWS EC2 production environment using PM2 for process management and application reliability.

Collaborated closely with the mobile app development team, ensuring seamless integration between the backend API and the client application.

Javascript Developer
(#ديسمبر ٢٠٢٤ - #يونيو ٢٠٢٥ (#7## ش٥ور#

Create server-side logic for chat apps using socket .io with Express.js and Mongo Db. Deploy the app to an Aws ec2 production Linux server with a Pm2 package. cooperate with the client-side mobile app developer.

Frontend Developer
(#ديسمبر ٢٠٢٤ - #يونيو ٢٠٢٥ (#7## ش٥ور#

Developed a customized Next.js (TypeScript) admin dashboard integrated with a backend REST API, streamlining internal workflow management. Engineered a responsive, modular UI with Tailwind CSS, ensuring cross-device compatibility and modern design standards. Collaborated with backend developers to integrate dynamic data, optimize frontend performance, and maintain clean component architecture. Deployed the application to a production Linux environment using PM2, ensuring stable, continuous uptime.

Frontend Developer(Next js +typescript)
(#ديسمبر ٢٠٢٤ - #مايو ٢٠٢٥ (#6## ش٥ور#
الإمارات العربية المتحدة

Developed a customized Next.js (TypeScript) admin dashboard integrated with a backend REST API, enabling efficient management of internal workflows.

Engineered a responsive and modular UI using Tailwind CSS, ensuring cross-device compatibility and modern design standards.

Collaborated with backend developers to integrate dynamic data, optimize frontend performance, and maintain clean component architecture.

Deployed the application to a production Linux environment using PM2 for process management, ensuring stable and continuous uptime.

Node js Backend developer (Skyline car rental App)

(#أغسطس ٢٠٢٤ - #يناير ٢٠٢٥ (#6## ش٥ور#

مخافظة بيروت لبنان

Designed and developed a modular and secure backend architecture using Node.js, Express.js, and MongoDB, tailored to the business logic of a dynamic car rental platform.

Implemented core features including rental scheduling, pricing calculations, driver-client roles, and admin commission handling.

Ensured system scalability, data validation, and API security, applying best practices for authentication, authorization, and input sanitization.

Delivered fully documented RESTful APIs, enabling smooth integration with the frontend and mobile teams for a complete user experience.

Javascript Developer

(#مايو ٢٠٢٤ - #يناير ٢٠٢٥ (#9## ش٥ور#

Designed and developed a modular and secure backend architecture using Node.js, Express.js, and MongoDB, tailored to the business logic of a dynamic

car rental platform. Implemented core features including rental scheduling, pricing calculations, driver-client roles, and admin commission handling. Ensured system scalability, data validation, and API security, applying best practices for authentication, authorization, and input sanitization. Delivered fully documented RESTful APIs, enabling smooth integration with the frontend and mobile teams for a complete user experience.

Node js Back End developer (Multi Vendor ecommerce web app app)

(#مايو ٢٠٢٤ - #أغسطس ٢٠٢٤ (#4## ش#ور#

لبنان

As aNode.js Backend Developer, I have developed and maintained high-performance server-side applications using Node.js and Express.
Automotive Listings Platform: Developed a platform for managing automotive listings with advanced filtering and search capabilities
API Integration for E-commerce (Similar to Dubizel): Designed and implemented APIs for an e-commerce application, ensuring robust security and data validation.
My experience in backend development, collaboration, and deployment has enabled me to deliver high-quality solutions that meet business requirements and exceed user expectations.

AVIT - Aviation Information Technology

Technical Support Engineer

(#أغسطس ٢٠١٨ - #مايو ٢٠٢٣ (#4# من الأعوام ##10# ش#ور#

الجيزة مصر

-Research and identify solutions to software and hardware issues
-Diagnose and troubleshoot technical issues, including account setup and network configuration
-Ask customers targeted questions to quickly understand the root of the problem
-Track computer system issues through to resolution, within agreed time limits
Talk clients through a series of actions, either via phone, email or chat, until they’ve solved a technical issue

Ekhliil

Node js back end developer

(#ديسمبر ٢٠٢٠ - #مايو ٢٠٢١ (#6## ش#ور#

السعودية

• Developed RESTful APIs and server-side applications using Node.js, Express.js, and MongoDB for mobile application back ends for ecommerce platforms.

• Documented APIs using Swagger to ensure clarity and ease of integration for frontend and mobile application developers.
• Participated in weekly meetings to discuss daily tasks, progress

Egyptsat Telecom
Satellite Network engineer
2012 - 2017 (#5# من الأعوام)
القاهرة، مصر

Responsible for designing programs for orbiting satellites. Ensures satellites are functioning properly, creates command systems, and remotely controls satellite activities.
